"Any fool can write code that a computer can understand. Good programmers write code that humans can understand."

- **BAD**
  ```
  // elapsed time in days
  protected $d;
  public $genymdhms;
  ```

- **GOOD**
  ```
  protected $fileAgeInDays;
  public $generationTimestamp;
  ```

- **DO**
  - Try ... Catch
  - Use PSR-2
  - Delete all commented code (we have GIT)
  - Small Functions

- **AVOID**
  - Large Methods
  - Large Classes
  - Noise comments
  - Static ::
  - Repeating yourself

- **DON’T**
  - Core hacks
  - Magic numbers

- **ADDITIONAL ADVICE**
  - Methods should only do one thing
  - Don’t comment bad code, rewrite it
  - If your code is readable enough you don’t need comments
